When a man makes the air blue with Sunday school words because his gas engine wont run, there is one of two things wrong—his engine is either out of fix or he has gasoline that wont test up to the standard. The Courier sells gasoline the kind that will stand the test. If its our kind you are using—fix the engine.

# You Can't Argue Against Success

The true value of an Idea, a Plan or a Shoe is measured only by actual experience. The individual person, here and there, may criticise; but if the great majority—the great mass—stamps it "O. K." THEN IT IS "O. K."

## "Red Cross Shoes" Are O. K.

### \$3.00 = 3.50 = \$4.00

The immense number of these shoes we take off with the usual request for "another pair just like them," is unprecedented in the history of shoe retailing. If there is any question in your mind as to the superiority of them, buy a pair and find out to your own entire satisfaction.

### Home-Made Refrigerator.

Take two large boxes, the second one somewhat smaller on all sides, and bore two one inch holes in each correspondingly, to give drainage and ventilation. Fill up the bottom of the large box with powdered charcoal (or sawdust, if charcoal cannot be procured) until the smaller box will stand on a level with the top of the large box. Put the inner box in place, and fill up all the place around the sides with the charcoal. Fasten lids on both boxes to fit tightly. On each side of the inner box, by means of the cleats, put several shelves, leaving a space in the center for the ice.

A rack made of lathing may be laid at the bottom, for the ice to rest upon. Legs may be added also and the drainage and ventilation in this way be improved.

The Courier and the weekly Commercial-Appeal one year for \$1.25.
